

AUTOREACH

- MotorVac develops, manufactures and distributes fluid exchange and diagnostic equipment and various types of preventive maintenance service products to the automotive aftermarket. MotorVac's history can be traced back to 1992 when the CarbonClean gas fuel cleaning system quickly became the "standard" in the industry. The product line continued developing into different automotive fluid exchange systems and is now recognized as a leading supplier of professional automotive maintenance equipment and service products.
- The MotorVac range of fuel and exhaust cleaning, diagnostic equipment and chemicals are designed to clean the vehicle's fuel system, reduce emissions, but most of all improve the performance of the engine, the technology is designed for the complete fuel and exhaust system and covers both petrol and diesel engines.

EGR Cleaning Tool

- Part No. 500-0170
- For Diesel EGR System Cleaning on the intake and exhaust sides of the EGR valve and cooler.
- Designed for on-vehicle preventative maintenance and service of the EGR circuit
- Using our Part#400-0280 and special foaming process the service gives immediate results
- Carbon Deposits are liquefied and sent through the exhaust stream.
- Partial clean with “S” Tool through Induction system.
- More comprehensive clean if required via adaptors.
- Can be used to clean DPF filters as well.

Diesel Tune 4000

- Profitable Shop Service Equipment That Cleans Carbon From a Diesel Engine in Less Than An Hour
- Reduces emission's by cleaning the fuel system and removing carbon and other build ups.
- Greatly Reduces Turbo Lag and Restores Peak Pressure
- Increases HP and Torque Throughout the RPM Range to Improve Fuel Leakage
- Removes Carbon from the Combustion Chamber to Increase Injector and Glow Plug Life
- Cleans Injector Pumps by Dissolving Harmful Deposits to Slowly Extend the Life of the Pump
- System Will Service Cars or Trucks Up to 750 HP

DieselTune
Complete Diesel System Service

CarClean System

- The perfect preventative maintenance (PM) service because it can be run on any vehicle
- Unattended operation with automatic shut off, makes money while performing other work.
- Restores in-vehicle air quality throughout the entire HVAC ventilation system and passenger cabin.
- Cleans and deodorizes the entire HVAC System using Nano-Droplet technology designed for use with Mist solution.
- Simple one button operation allows for easy service procedure
- Built in low-fluid sensor alerts and protects the machine
- Portable, Operates on 12 Volt DC

UltraSonic MiST
Part No. 400-0501

CarbonClean 1000

- Complete, professional fuel injection cleaning and engine decarbonizing service
- Unique time saving adapter system makes connecting to the rail simple and fast
- An easy to use online application guide provides visual, step by step instructions on how to attach to thousands of vehicles quickly
- Built in diagnostic capabilities
- Premixed detergent solution utilizes MotorVac's proprietary CarbonClean chemistry
- Most importantly a good profit maker with a short pay back period.

Cool Smoke

- Part No 500-0100
- Does not use a heat source to produce smoke
- No warm up time, produces smoke instantly
- No risk of explosion/combustion inside unit
- Operates with shop air
- No harmful vapours from burning of oil
- Test for leaks with or without smoke
- Test for leaks during routine maintenance
- Allows for pressure and vacuum decay testing
- Shuts off the flow of air when the machine is off

Cool Smoke
EVAP Leak Detection System

RECOMMENDED CHEMICALS
Cool Smoke Fluid
Part No. 400-1054

CarbonClean Dual

- Works on gas/petrol and diesel fuel systems
- New variable pressure for diesel lift pumps up to 100psi or 6.8 bar.
- Two dedicated systems for more effective cleaning.
- Simple and easy control panel to operate during service.
- Portable - 12 Volt DC Power
- Service Benefits Includes: Improved Mileage, Improved Performance and Emissions Reduction
-
- **Excellent return on investment. One service per day will pay for the machine in a few months!**

**RECOMMENDED CHEMICALS
MV3 / MV4 / MV3D**

Part No. 400-0020
Part No. 400-0030**

TransTech 111

Mighty by MotorVac TransTech IV Demo.mp4

- A complete professional In-line Automatic Transmission Fluid cleaning, exchange and conditioning system that is now even easier to use with our new Automatic Flow Direction Technology and our exclusive in-line chemical treatment program.
- Automatic Flow Direction Switch with Anti-backflush Filtration: Connect and press Start, the TransTech III+ senses and adjusts flow direction automatically.
- In-line Treatment Injection System: Injects ATF Flush and Treatment quickly and easily.
- **Excellent return on investment. One service per day will pay for the machine in a few months!**

RECOMMENDED TOOLS & EQUIPMENT
**TransTech Inline
Service Kit**

CoolantClean111

- Complete Coolant Exchange In Less Than 15 Minutes
- One Multi-Function Switch Operation
- Portable, Operates On 12 Volt DC Power
- Easy Connection Through Radiator Hose
- Internal Waste Tank
- Easy Service Filter
- Sturdy, Compact Design
- Comprehensive Adapter Kit for most cars

MotorVac Coolant Clean III.mp4

MotorVac CC5 & CC6
400-0138

Vacufill Coolant Exchange

- **Connects easily to all engine cooling systems**

Simply connect to radiator opening or reservoir tank. No need to cut heater hoses or disconnect upper radiator hoses

- **Tests for leaks**
- **Eliminates potential airlock problems**
- **No electrical or moving parts. Operates completely on shop air.**
- **Quickly refills in seconds**
- **Safely store used coolant in large 12 gal. (45.4 L) holding reservoir.**

BrakeVac 11

MotorVac BrakeVac II - Performing A Brake Flush - Copy.mp4

- **Part No. 500-8100**
- Simple – Machine conducts a full brake service with a one man operation
- Easy – Accessible functions and controls facilitate a quick and easy procedure
- Safe – No spilled fluid on the floor during exchange process protects both the technician and the vehicle
- Fast – Complete fluid exchange in about 10 minutes
- Portable – Unit is 12 volts DC to allow for greater flexibility to perform service
- Reliable – Virtual 100% exchange delivers the highest quality service to customers

Diff- Vac 1000

- Part No. 500-9025
- Extract or Exchange Differential, Engine Oil, Transmission, Power Steering, Coolant and Transfer Case Fluids
- Two 5 GPM diaphragm pumps provide deep vacuum for extraction of high viscosity fluids under all temperature conditions
- Air operated – no need to waste time locating & connecting to battery terminals
- Two dedicated pumps – no cross contamination between used and new fluids
- Optional Drain Hose – does not limit the amount of fluid that can be recovered

Diff-Vac 1000
*Differential and Multi
Fluid Exchange System*

SteerClean

- **Part No 500-7050**
- Single wand and switch allows one-man operation.
- Front panel controls all machine functions.
- Industrial grade hoses and connections.
- Separate high volume pumps for vacuum and fill modes.
- Safe – Completes exchange process without spills.
- Fast – Complete fluid exchange and treatment in 5 minutes.
- Portable – Unit is powered by 12 volt DC and can be used anywhere.
- Convenient – No bay space is required to perform the service.
